

LEARNING AT HOME OLDER TODDLER WEEK 10

May 25th-29th

Dear Families,

We are excited to launch plans for Week 10. There are some great options for physical activities in an indoor environment. Additionally, some simple ideas with materials available at home to support the creative undertakings. We hope you enjoy this week's plan with your little ones!

Language Development

Outside Safety

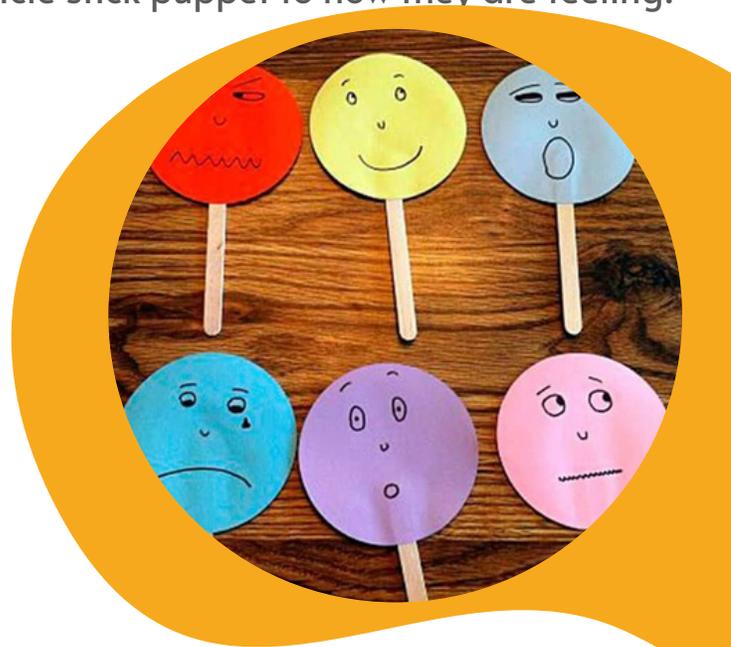

With nice weather in our future, talk to your toddler about outside safety. Make sure to explain that they have to follow rules outside to stay safe. Be sure to introduce sunscreen and explain the importance of wearing it in the sun.

Social-Emotional Development

How do I feel?

Take pictures of your child doing different faces for their emotions. Add the pictures (or draw the faces on circles) to the end of Popsicle sticks. Throughout the day, talk to your child about how they are feeling. Have them match the Popsicle stick puppet to how they are feeling.

Physical Literacy

Farm Animal Charades

Have your child pull a farm animal picture out of a bin or hat and act out that animal. Play as a family and see who can act like the animals the best.

LEARNING AT HOME OLDER TODDLER WEEK 10

May 25th-29th

Cognitive Development

Counting Farm Animals

Using pictures of farm animals, stuffed animals or animal toys that you have, encourage your child to count the number of animals they have. If you have multiple of the same animal, have your child sort the animals and see how many of each animal they have.

Creative Activity

Crayon Drawing Farm

Using crayons and paper, have your child draw a farm with animals and a barn. Show them pictures of a farm so they can see what the animals look like. Their animals may look like scribbles and that is okay. Work on how they are holding the crayon to help with control.

Additional Activities

Farm Animal Puppets: Using a variety of materials that you have around your house (socks, paper bags, Popsicle sticks, felt), let your child make farm animal puppets that they can use to act out the animal sounds.

Build a Barn: Provide your child with blocks or recycled materials that they can use to build a barn.

Cutting Practice: Using child scissors, let your child cut scrap paper. Help your child learn to hold the scissors and use them. This is a supervised activity to make sure your child stays safe.
