

LEARNING AT HOME YOUNG PRESCHOOLER WEEK 6

January 4th- January 8th

Dear Families,

We are excited to launch plans for Week 6. There are some great options for physical activities in an indoor environment. Additionally, some simple ideas with materials available at home to support the creative undertakings. We hope you enjoy this week's plan with your little ones!

Language Development

Alphabet Matching

Provide your child with materials that they can use to match the alphabet. You can give them magnetic letters to match, flashcards or make your own homemade letter matching game.

Social-Emotional Development

If your happy and you know it

Sing the song if you are happy and you know it with your child. Change up the words a little and add different emotions to the song. Add motions to go with the different emotions (sad-rub your eyes, excited-jump, mad- make a mad face)

Physical Literacy

Listening Walk

Take a walk outside with your child. Have them listen to the sounds of nature that they may hear outside. Talk about what you hear as they walk.

LEARNING AT HOME YOUNG PRESCHOOLER WEEK 6

January 4th- January 8th

Cognitive Development

Build a Bridge

Provide your child with blocks, legos, recycled materials and other building materials. Give them paper and writing materials that they can use to design a bridge. After they design it on paper, have them try to build it with the building materials.

Creative Activity

Drip Paintings

Provide your child with eye droppers, watercolors (or food coloring water), construction paper, cookie sheet and blocks. Use the blocks to make an incline for the cookie sheet. Add the paper and let your child drip paint onto the paper and watch it slide down.

Additional Activities

Let's Make Noise: Provide your child with metal mixing bowls, cookie sheets, wooden spoons, pots and pans. Let your child use the wooden spoons to make noise on the metal objects.

Paper Cup Phones: Make paper cup phones using paper cups, fishing line, wire, or yarn. Connect the two cups with the string of your choice then try talking to each other through the cups.

Cutting Practice: Provide your child with old magazines or food flyer and scissors. Let your child practice cutting by cutting out items in the magazines. One thing to make sure is that they are holding the scissors properly. *This is a supervised activity
